PATENT

SILICA-SODA-LIME GLASS COMPOSITIONS AND THEIR APPLICATIONS

Filed by: SAINT-GOBAIN VITRAGE

ABSTRACT

The subject of the invention is a glass composition of the silica-soda-lime type, intended for the manufacture of substrates or sheets, the said glass composition having a ϕ coefficient of between 0.50 and 0.85 N/(mm².°C) and a working point of less than 1200°C.
